WARNING: Please refer to the System Installation Manual for information on limitations regarding product use and function and information on the limitations as to liability of the manufacturer.

NOTE: These instructions shall be used in conjunction with the system Installation Manual of the Control Panel with which this equipment is intended to be used.

ATTENTION: Ce manuel contient des informations sur les restrictions concernant le fonctionnement et l'utilisation du produit et des informations sur les restrictions en ce qui concerne la responsabilité du fabricant. La totalité du manuel doit être lu attentivement.

NOTE: Ce manuel doit être utilisé en conjonction avec le Manuel d'installation du Panneau de contrôle.

ATENCIÓN: Consulte el Manual de instalación del sistema para obtener información sobre las limitaciones del uso y funciones del producto, así como las limitaciones de la responsabilidad del fabricante.

NOTA: Estas instrucciones deberán utilizarse conjuntamente con el Manual de instalación del sistema del Panel de control con el que se vaya a utilizar este equipo.

AVISO: Consulte o Manual de instalação do sistema para obter informações acerca das limitações relativas à utilização do produto e funções e informações acerca das limitações relativas à imputação de responsabilidades ao fabricante.

NOTA: Estas instruções devem ser utilizadas em conjunto com o Manual de instalação do sistema do painel de controlo com o qual este equipamento se destina a ser utilizado.

DSC®

PowerSeries™

SECURITY SYSTEM

29007203R002

English Installation Instructions

The PK55XX/RFK55XX keypads can be used on security systems with up to 64 zones. These keypads are compatible with the following DSC security systems:

- PC580
- PC1616
- PC5008
- PC5020
- PC585
- PC1832
- PC5010
- PC1555MX
- PC1864
- PC5015
- PC1565
- PC5005
- PC5016

The RFK55XX keypads combine a wireless receiver with the respective PK55XX keypad.

Specifications

- Temperature range: -10°C to +55°C (14°F to 131°F), Temperature range for UL/ULC: 0°C to +49°C (32°F to 120°F)
- Humidity (MAX): 93%RH.
- Plastic enclosure protection degree: IP30, IK04
- Voltage rating: 12Vdc nominal
- Connects to control panel via 4-wire Keybus
- 1 keypad zone input/PGM output*
- PK55XX Current draw: 50mA (standby)/125mA (maximum)
- RFK55XX Current draw: 75mA (standby)/135mA (maximum)
- Wall mount tamper
- 5 programmable function keys
- Ready (Green LED), Armed (Red LED), Trouble (Yellow LED), AC (Green LED)
- Low temperature sensor
- Frequency: 433.92MHz (RFK55XX-433 Only)
- Up to 32 wireless zones (RFK55XX Only)

NOTE: * Zone not to be programmed as Fire type or 24h type.

Unpacking

The Power keypad package includes the following parts:

- One Power keypad
- Four mounting screws
- 2 end-of-line resistors
- Keypad inner door labels
- 1 tamper switch
- Installation Instructions

Mounting

You should mount the keypad where it is accessible to designated points of entry and exit. Once you have selected a dry and secure location, perform the following steps to mount the keypad.

Disassemble Keypad

1. Removing the keypad from the backplate for the first time.
 - (a) Position the keypad as indicated, insert screwdriver and rotate.

2. Removing the keypad from backplate once mounted.
 - (a) Open door, holding it 90° to the keypad, as shown below.
 - (b) Insert screwdriver into slot located under the door hinge and rotate the screwdriver.

Mount and Wire Keypad

1. Secure Keypad to wall using mounting holes. Use all 4 screws provided unless mounting on a single gang box.
2. Place keypad into hooks on the backplate and swing down to engage.
3. Run wire through wiring slot or knockouts. Connect Keybus and PGM/Zone wiring to keypad. Place tamper switch into tamper hole on backplate.
4. Remove keypad from hooks. Place keypad into backplate, ensure the wire is pushed back into the wall as much as possible. Route the wire inside the keypad ensuring high components are avoided. Snap the front assembly closed, ensuring that there is no pressure to the keypad from the wire below.

NOTE: If any tension found between the front keypad assembly and wiring, please open the keypad reroute the wire and close again. Repeat these steps until the keypad is closed properly.

Wiring

1. Before wiring the unit, ensure that all power (AC transformer and battery) is disconnected from the control panel.
 2. Connect the four Keybus wires from the control panel (red, black, yellow and green) to the keypad terminals. Refer to diagram:
- | | |
|---------|-----------------------|
| | PK55XX/RFK55XX |
| RED — R | ⊕ |
| BLK — B | ⊖ |
| YEL — Y | P |
| GRN — G | Z |
| | To zone or PGM output |
3. If programmed as an input, you can connect a device - such as a door contact - to the 'P/Z' terminal of the keypad. This eliminates the need to run wires back to the control panel for the device. To connect the zone, run one wire from the device to the 'P/Z' terminal and the other wire from the device to the B (black) terminal. For powered devices, run the red wire to the R (positive) terminal and the black wire to the B (negative) terminal. When using end of line supervision, connect the zone according to one of the configurations outlined in your system's Installation Manual.
 4. If the 'P/Z' terminal is programmed as an output, the output follows the PGM programmed in Section [080]. A small relay, buzzer or other DC

operated device may be connected between the positive supply voltage and the 'P/Z' terminal (maximum load is 50mA).

NOTE: For UL Residential Fire Installations use at least one additional DSC compatible keypad in conjunction with an RFK55XX-433 keypad or install the RFK55XX-433 keypads within 3 feet from the control unit and mechanically protect the keybus wires

Applying Power

Once all wiring is complete, and the equipment is secured to the building structure with at least two screws apply power to the control panel:

1. Connect the battery leads to the battery.

2. Connect the AC transformer.

For more information on control panel power specifications, see the control panel Installation Manual.

Programming the Keypad

There are several programming options available for the keypad. These are described below. Programming the keypad is similar to programming the rest of the system. When you are in the keypad programming sections, the keypad will display which options are turned on along the top of the display. To turn an option

on or off, press the number corresponding to the option on the number pad. The numbers of the options that are currently turned ON will be displayed. For example, if options 1 and 4 are on, the display will look like this on the different keypad displays:

For information on programming the rest of your security system, please refer to your system's Installation Manual.

Broadcasting LCD Labels

All LCD programming is done per keypad. If more than one LCD keypad is present on the system, labels programmed at one keypad can be broadcast to all other LCD keypads. Perform the following procedure in order to broadcast labels:

Step 1 - Program one LCD keypad completely.

Step 2 - Make sure all LCD keypads are connected to the Keybus.

Step 3 - Enter keypad programming by pressing **[*][8][Installer Code][*]**, then enter section [998] at the keypad that was programmed. The keypad will now broadcast all the information programmed to all the other LCD keypads on the system.

Step 4 - When the keypad is finished press the **[#]** key to exit.

NOTE: Label broadcast from this keypad is only compatible with other PK5500 and RFK5500 Keypads.

Language Programming (PK5500/RFK5500 Only)

Hold (<>) keys for 2 seconds to enter language programming, scroll to the desired language and Press **[*]** to select.

NOTE: If section [077] option 4 is OFF, language programming can only be performed while in installers programming.

Enrolling the Keypad

The keypad will need to be assigned to a partition and slot if supervision or keypad zones are being used. Keypad assignments and keypad option programming must be done at each keypad individually.

The 1st digit of keypad assignment is used to determine partition assignment (1 to 8). If partitioning is not used, enter [1]. For Global Keypads, enter [0].

NOTE: LED and ICON keypads cannot be programmed as Global Keypads

The 2nd digit of keypad assignment is used to determine slot assignment for keypad supervision. Each keypad will be assigned a different slot number from 1 to 8. PK5500 and RFK5500 LCD keypads come defaulted in slot 8. If LCD keypads are used one LCD keypad must remain in slot 8.

NOTE: The RFK55XX enrolls as two modules:

Light 1 = keypad section of the RFK55XX

Light 17 = receiver section of the RFK55XX

NOTE: Deleting all wireless devices from the RFK55XX or defaulting the RFK55XX will cause a supervisory fault.

Enter the following at each keypad installed on the system:

1. Enter Installer Programming by pressing **[*][8][Installer's Code]**

2. Press [000] for Keypad Programming

3. Press [0] for Partition and Slot Assignment

4. Enter the 1st digit (0 to 8 for partition assignment)

5. Enter the 2nd digit (1 to 8 for slot assignment supervision)

6. Press the **[#]** key twice to exit programming.

7. After assigning all keypads, perform a supervisory reset by entering **[*][8][Installer's Code][902]** and wait for 60 seconds.

8. Press the **[#]** key to exit programming after 60 seconds.

Programming Labels (PK5500/RFK5500 Only)

1. Enter keypad programming by pressing **[*][8][Installer Code][*]**. Enter the 3-digit section number for the label to be programmed.

2. Use the arrow keys (<>) to move the underline bar underneath the letter to be changed.

3. Press the number keys [1] to [9] corresponding to the letter you require. The first time you press the number the first letter will appear. Pressing the number key again will display the next letter.

[1] - A, B, C, 1 [4] - J, K, L, 4 [7] - S, T, U, 7 [0] - Space

[2] - D, E, F, 2 [5] - M, N, O, 5 [8] - V, W, X, 8

[3] - G, H, I, 3 [6] - P, Q, R, 6 [9] - Y, Z, 9, 0

4. When the required letter or number is displayed use the arrow keys (<>) to scroll to the next letter.

5. When you are finished programming the Zone Label, press the **[*]** key, scroll to "Save," then press **[*]**.

6. Continue from Step 2 until all Labels are programmed.

NOTE: Label Programming can also be accessed from the **[*][6] User Functions Menu**

Changing Brightness/Contrast

LCD Keypads

1. Press **[*][6][Master Code]**.

2. Use the [**<**]**[>**] keys to scroll to either Brightness Control or Contrast Control.

3. Press **[*]** to select the setting you want to adjust.

4. a) 'Brightness Control': There are multiple backlighting levels. Use the [**<**]**[>**] keys to scroll to the desired level.

b) 'Contrast Control': There are 10 different display contrast levels. Use the [**<**]**[>**] keys to scroll to the desired contrast level.

6. To exit, press **[#]**.

LED/ICON Keypads

1. Press **[*][6][Master Code]**.

2. Use the [**>**] key to move through the 4 different backlighting levels.

3. The level is automatically saved when you press **[#]** to exit.

Changing the Buzzer Level

LCD Keypads

1. Press **[*][6][Master Code]**.

2. Use the [**<**]**[>**] keys to scroll to Buzzer Control.

3. There are 21 different levels, use the [**<**]**[>**] keys to scroll to the desired level.

4. To exit, press **[#]**.

LED/ICON Keypads

1. Press **[*][6][Master Code]**.

2. Use the [**<**] key to move through the 21 different buzzer levels.

3. The level is automatically saved when you press **[#]** to exit.

Limited Warranty

Digital Security Controls warrants that for a period of 12 months from the date of purchase, the product shall be free of defects in materials and workmanship under normal use and that in fulfillment of any breach of such warranty, Digital Security Controls shall, at its option, repair or replace the defective equipment upon return of the equipment to its repair depot. This warranty applies only to defects in parts and workmanship and not to damage incurred in shipping or handling, or damage due to causes beyond the control of Digital Security Controls such as lightning, excessive voltage, mechanical shock, water damage, or damage arising out of abuse, alteration or improper application of the equipment.

The foregoing warranty shall apply only to the original buyer, and is and shall be in lieu of any and all other warranties, whether expressed or implied and of all other obligations or liabilities on the part of Digital Security Controls. Digital Security Controls neither assumes responsibility for, nor authorizes any other person purporting to act on its behalf to modify or to change this warranty, nor to assume for it any other warranty or liability concerning this product.

In no event shall Digital Security Controls be liable for any direct, indirect or consequential damages, loss of anticipated profits, loss of time or any other losses incurred by the buyer in connection with the purchase, installation or operation or failure of this product.

Warning: Digital Security Controls recommends that the entire system be completely tested on a regular basis. However, despite frequent testing, and due to, but not limited to, criminal tampering or electrical disruption, it is possible for this product to fail to perform as expected.

Important Information: Changes or modifications not expressly approved by Digital Security Controls could void the user's authority to operate this equipment.

FCC Compliance Statement

Caution: Changes or modifications not expressly approved by Digital Security Controls could void your authority to use this equipment.

This equipment generates and uses radio frequency energy and if not installed and used properly, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for Class B device in accordance with the specifications in Subpart "B" of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in any residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to television or radio reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient the receiving antenna
- Relocate the alarm control with respect to the receiver
- Move the alarm control away from the receiver
- Connect the alarm control into a different outlet so that alarm control and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the FCC helpful: "How to Identify and Resolve Radio/Television Interference Problems". This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402, Stock # 004-000-00345-4.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
IC:160A-RFK55XX4

The term IC before the radio certification number signifies that the Industry Canada technical specifications were met.

EN5131-1 Grade2/Class II

Operating Instructions shall be made available to the user.

DSC erklærer herved at denne komponenten overholder alle vigtige krav samt andre bestemmelser gitt i direktiv 1999/5/EC.

Por este meio, a DSC, declara que este equipamento está em conformidade com os requisitos essenciais e outras determinações relevantes da Directiva 1999/5/EC.

"DSC bekræfter herved at denna apparat uppfyller de väsentliga kraven och andra relevanta bestämmelser i Direktivet 1999/5/EC".

Con la presente la Digital Security Controls dichiara che questo prodotto è conforme ai requisiti essenziali ed altre disposizioni rilevanti relative alla Direttiva 1999/05/CE.

Por la presente, DSC declara que este equipo está en conformidad con los requisitos esenciales y otros requisitos relevantes de la Directiva 1999/5/EC.

Hierdurch erklärt DSC, daß dieses Gerät den erforderlichen Bedingungen und Voraussetzungen der Richtlinie 1999/5/EC entspricht.

Όλα τα προϊόντα της DSC, έφλησαν ότι αυτή η συσκευή είναι σύμφωνη με τις ουσιαστικές απαιτήσεις και με άλλες τις άλλες σχετικές διατάξεις της Οδηγίας 1999/5/EC.

Hierbij verklaart DSC dat dit toestel in overeenstemming is met de eisen en bepalingen van richtlijn 1999/5/EC.

Par la présente, DSC déclare que cet article est conforme aux exigences essentielles et autres relevantes stipulations de la directive 1999/5/EC.

DSC vakuuttaa laitteen täyttävän direktiivin 1999/5/EC olennaiset vaatimukset.

Hereby, DSC, declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

The complete R & TTE Declaration of Conformity can be found at www.dsc.com/intl/rttedirect.htm.

Keypad Display Symbols

	8 Bypass — Indicates that there are zones automatically or manually bypassed.
	9 For Future Use
	10 Arm Mode — Indicates the mode the panel is armed in. Stay — Stay — Indicates that the panel is armed in the Stay Mode. It will turn on at the beginning of the Exit Delay
	11 Away — Indicates that the panel is armed in the Away Mode. It will turn on at the beginning of the Exit Delay
	12 Chime — This icon turns on when Door Chime is enabled on the system and will turn off when Door Chime is disabled.
	1 Fire — Indicates that there are fire alarms in memory.
	2 Memory — Indicates that there are alarms in memory.
	3 Ready Light (green) — If the Ready light is on, the system is ready for arming.
	4 Armed Light (red) — If the Armed light is on, the system has been armed successfully.
	5 System Trouble — Indicates that a system trouble is active.
	6 AC — Indicates that AC is present at the main panel.
	7 Program — Indicates that the system is in Installer's Programming, or the keypad is busy.
